Performance in Motion

Avago Technologies is the industry-leading supplier of motion control encoders.
Avago offers "one-stop shopping" with its extensive portfolio of encoders, decoders and controllers. We offer the industry's smallest form factors, widest range of resolutions, and highest level of integration to reduce the number of components needed and shorten time-to-market.

Introduction

Motion control, in broad definition, means converting mechanical movement from codewheel/codestrip into equivalent electrical signals to move an object in an accurate and precise manner.

High accuracy, ease of use, low cost and global support…these words are rarely spoken in the same breath to describe anything. With Avago's broad range of encoders, this is now a reality.

Avago started out designing and selling classical optical encoders and has progressed to designing and manufacturing ultra miniature optical encoders and magnetic encoders. With these technologies, Avago has enabled designers to miniaturize their design with full confidence of excellent performance. Avago is changing the landscape of rotary and linear motion control.

Human Interface Devices

Controller

Rotary Pulse Generator (HRPG Series)

Feedback

Encoder accuracy, large range of Counts Per Revolution (CPR) options, low cost and high reliability have been key customer requirements. With Avago's range of encoders, these criteria are met and exceeded. Also, as Avago's encoders are optics based, they are immune to RF interference.

For almost all closed-loop feedback systems, the encoder's role as positioning sensor is crucial in providing the direct measurement for position and movement within the system. Avago provides a whole range of encoders capable of meeting these stringent needs.

Applications

Avago's products meet the stringent requirements, in a wide range of applications from printers, copiers and scanners to servo and stepper motors, and robotic arms and wafer-handling machines.

Office Automation
- Printers
- Copiers
- Tape Drives
- Plotters

Consumer
- Cameras
- Card Readers
- Motor Control

Motor Manufacturers
- DC Motors
- Stepper Motors
- Servo Motors

Instruments
- Audio & Visual Boards

Industrial Automation
- Wafer Handling Machines
- Industrial Sewing Machines
- Robotics
- CAD/CAM Dial Boxes
- Vending Machines

Medical
- Blood Analyzers
- Lab Sample Handling Equipment
- Surgical Robotics

Value Propositions

Customer Reach

Worldwide distribution/channels, with Technical Response Centers, supported by experienced Field Application Engineers

State-of-the-Art-Technology

Innovative designs by a vast pool of experienced software, hardware and IC designers to deliver the ultimate performance product

High Quality Services

ISO Certified, continuous process improvement, field support from all regions and quality management of supply chain

Our Commitment

Our worldwide support team will work with you to meet your requirements and put your designs in motion.

	Features	Benefits
Reliability	Longer lifespan for encoders due to elimination of mechanical parts.	Low maintenance cost.
Size	Integrated encoder solution comes in different packages (e.g. chip-size and SOIC packages vs. industrial-grade robust housing) and mountings that can be catered to customer's specific needs.	Small form factor. High performance in small package. Well suited for space-constrained applications.
Reduced Switching Glitch	Optical technology promotes quiet switching as no switching transients are generated without electrical contacts.	Accurate and precise motion sensing.
High Resolution	• Up to 80,000 counts per revolution (incremental) • Up to 65,536 positional data per revolution (absolute) • Up to 1 million or more positional data per revolution for customized solutions. Technology is not limited to quasi absolute/absolute.	Accurate and precise motion sensing.
Surface Mount	Smaller package delivers the same functionality as standard DIP.	Lower assembly cost. Easier, faster handling, improved solderability.
Cost-Effective, High Performance	Newest encoder module features reduced component and package sizes. Delivers higher performance, easier installation through patented alignment plug and play tool.	Reduced design cycles. Small form factor. Reduced cost.

Transmissive Module

HEDS-90xx/91xx/9200, HEDL-90xx/91xx Series, HEDT-90xx/91xx Series

Description

HEDS-9000/9040/9100/9140 Series

- High-performance two/three channel rotary encoder

- Consists of a lensed (LED) source and a detector IC enclosed in a small C-shaped plastic package

- Extremely tolerant to mounting misalignment due to a highly collimated light source and unique photodetector array

- The single 5-V output supply input are accessed through five 0.025 inch square pins located on 0.1 inch centers

- HEDS-9000 resolution: from 500 to 2048 CPR when used with appropriate codewheel

- HEDS-9040 is designed for use with a HEDx-614x codewheel which has an optical radius of 23.36 mm (0.920 inch)

- HEDS-9100 resolution: from 50 to 1024 CPR when used with appropriate codewheel

- HEDS-9140 is designed for use with the HEDS-5140 codewheel which has an optical radius of 11.00 mm (0.433 inch)

HEDS-9200 Series

- Same features as listed above

- Detects linear position when operated in conjunction with a codestrip

HEDL-90xx/91xx Series

- Differential outputs

- Utilizes an industry-standard line driver IC, 26C31, which provides complementary outputs for each encoder channel

- Offers enhanced performance when the encoders are used in noisy environments, or when required to drive long distances

- Suggested line receivers are 26C32 and 26C33

- Quadrature signals are accessed through a cable and 10-pin female connector, which is manufactured by FCI, part number: 66900-310

- Mating connectors manufactured by FCI; straight type part number: 71912-010, right angle type part number: 71913-010

HEDT-90xx/91xx Series

- High performance

- Low cost

- Operates to 125°C

- Ideal for high volume automotive applications

HEDT-9040/9140 Series

- High temperature

- Three channels (two channel quadrature output plus a third channel index output)

- Operates up to 140°C

Features

- High performance

- High resolution

- Low cost

- Easy to mount

- No signal adjustment required

- Small size

- -40°C to 100°C operating temperature (up to 140°C for high temperature version)

- Two and three channel quadrature output

- TTL compatible output

- Single 5-V supply

- Count frequency of 100 KHz

Applications

Ideal for high-volume applications:

- Printers

- Plotters

- Tape drives

- Factory automation equipment

Package Dimensions

- Refer to product datasheet for package dimensions

HEDS-9700/972x/973x/978x Series

Description

- High performance
- HEDS-973x is a high-resolution version of HEDS-9700
- Detects rotary or linear position when operated in conjunction with either a codewheel or codestrip
- Consists of a lensed (LED) source and a detector IC enclosed in a small C-shaped plastic package
- Extremely tolerant to mounting misalignments due to a highly collimated light source and unique photodetector array
- Two channel digital output
- 5 V supply input
- Four solder-plated leads located on 2.54 mm (0.1 inch) centers
- Standard HEDS-9700 is designed for use with 11-mm optical radius codewheel or linear codestrip. (Other options are available - refer to factory for further details)

Features

- Small size
- Wide resolution range
- No signal adjustment required
- Two channel quadrature output
- Single 5 V supply
- -40°C to 85°C operating temperature
- Multiple mounting options
- Linear and rotary options available
- Wave solderable
- RoHS compliant
- TTL compatible output
- Count frequency 20 KHz to 80 KHz

Applications
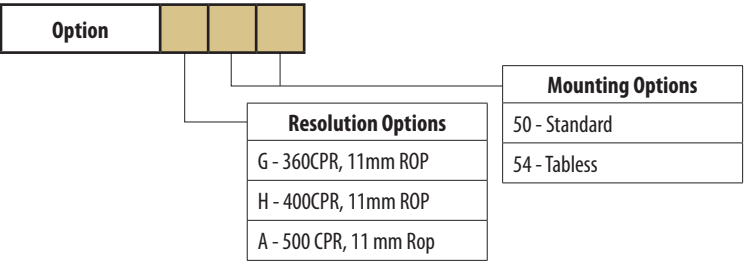

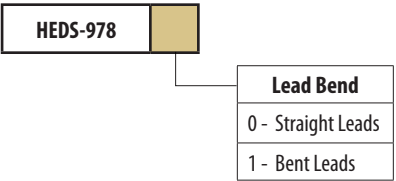

- Printers
- Plotters
- Copiers
- Office automation equipment

Incremental Optical Encoders
Transmissive Module

HEDS-971x Series

Description

- High performance
- Detects rotary position when operates in conjunction with a codewheel
- Consists of a lensed (LED) source and a detector IC enclosed in a small C-shaped plastic package
- Extremely tolerant to mounting misalignment due to a highly collimated light source and unique photodetector array
- Two channel analog output
- 5.5V and 3.3V options available
- Four solder plated leads located on 2.54 mm (0.1 inch) centers
- Designed for use with an appropriate optical radius codewheel. (Refer to factory for further details)

Features

- Small size
- Wide resolution range
- No signal adjustment required
- Single 5 V supply
- Two channel analog output
- 15° C to 45° C operating temperature
- Multiple mounting options
- Wave solderable
- RoHS compliant

Applications

- Printers
- Plotters
- Copiers
- Office automation equipment

Incremental Optical Encoders
Transmissive Module

AEDS-964x Series

Description

- High performance
- Ultra-miniature package
- Detects rotary or linear position when operated in conjunction with either a codewheel or codestrip
- Consists of lensed (LED) source and a detector IC enclosed in a small C-shaped plastic package
- Extremely tolerant to mounting misalignment due to a highly collimated light source and unique photodetector array
- Two channel digital output
- 3.3/5.0-V supply input
- Four solder plated leads located on 2.00 mm (0.1 inch) centers
- Supply input of LED rated at 16 mA, accessed through two leads located at 2.54 mm pitch
- Designed for use with an 11.00 mm optical radius codewheel or linear codestrip. (Other options are available – refer to factory for further details)

Features

- Low package height, small size
- Built-in codewheel and codestrip guide bumps
- For linear and rotary applications
- No signal adjustment required
- Insensitive to radial and axial play
- 0°C to 70°C operating temperature
- Wide resolution range
- Two channel quadrature output
- TTL, 3.3/5.0-V CMOS compatible
- Wave solderable
- RoHS compliant

Applications

- Printers
- Plotters
- Copiers
- Office automation equipment

Incremental Optical Encoders
Transmissive Module

AEDS-965x Series

Description

- Very small, low package height and high performance incremental encoder module
- Consists of lensed (LED) source and a detector IC enclosed in a small C-shaped plastic package
- Due to the brighter LED, coupled with a photodetector array, which is less sensitive to light, the encoder is highly tolerant to aerosol environment
- This module is extremely receptive to mounting misalignment
- The two channel digital outputs and Vcc, supply voltage input, are accessed through four solder plated leads located on 2.00 mm (0.1 inch) centers
- The supply input of LED, rated at 16mA is accessed through two leads located at 2.54 mm
- Designed for use with a linear codestrip (Other options are available – refer to factory for further details)

Features

- Small size
- Built-in guide bumps for codewheel and codestrip
- Low package height
- Insensitive to radial, tangential and axial play
- 0°C to 70°C recommended operating temperature
- Two channel quadrature output
- TTL 3.3V or 5.0V CMOS compatible
- For linear and rotary application
- Wave solderable
- RoHS compliant
- Aerosol tolerant

Applications

Incremental Optical Encoders
Transmissive Module

AEDS-96Ex Series

Description

- Very small, high performance, low cost optical incremental encoder module
- Consists of a lensed (LED) source and a detector IC enclosed in small C-Shaped plastic package
- Due to highly collimated light source and a unique photodetector array, the module is extremely tolerant to mounting misalignment
- The two channel analog outputs and 3.3 V supply input are accessed through four leads located on 2.00 mm centers for the detector and two leads located on 2.54 mm center for the emitter
- Designed for use with an appropriate optical radius codewheel. Contact factory for more information

Features

- Small size
- Low package height
- Resolution: 200 LPI
- 0°C to 60°C recommended operating temperature
- For linear and rotary applications
- Two channel analog output
- Single 3.3V supply*
- Wave solderable
- 1.52V LED forward voltage (IF = 16mA)*
- Built-in guide bumps for codewheel
- Tolerant to radial, tangential and axial play
- RoHS compliant

* Typical conditions

Applications

- Printers
- Copiers/Fax
- Plotters
- Office automation equipment

Transmissive Module

AEDA-3200/3300 Series

Description

- Ultra-miniature package with wide resolution ranges

- "One size fits all resolutions" concept makes it ideal for space-constrained applications

- Uses transmissive technology

- Consists of a lensed (LED) source, an integrated circuit with detectors and output circuitry, and an incremental track-glass codewheel that rotates between the emitter and detector IC

- Emitter and detector IC are housed in a C-shape module with the codewheel attached to a specially designed hub

- Eliminates customer need to design different platforms for different resolutions

- Extremely cost effective

- Specifically designed to serve the industrial market where applications require wide temperature ranges and high accuracy

- High operating frequencies

- Fits standard 2 mm customer solid shaft (Contact factory for other shaft sizes)

- AEDA-3200 Series modular unit offers a patented alignment tool which makes installation and assembly virtually plug & play. Eliminates the need for costly assembly machines and provides faster turn around time to manufacture. Encoder module comes in a C-shape module with a codewheel attached to a special hub

- AEDA-3300 series unit offers a pre-aligned and integrated bearing kit housing

- Assembled unit, offered at a slight cost increase, saves production cycle time. Encoder module comes in a pre-aligned and integrated bearing kit housing

Features

- AEDA-3200 - 17 mm Ø x 23.2 mm H (module size)

- AEDA-3300 - Bxx - 17 mm Ø x 24.0 mm H (module size)

- AEDA-3300 - Txx size - 28 mm Ø x 26.7 mm H (module size)

- Resolution ranges from 600 to 20,000 CPR (up to 80,000 after 4x decode)

- Wide operating temperature range from -40°C to 125°C

- Integrated line driver for long cable connection

- Easy assembly process with integrated bearing options

- Single 5V supply

- 1 MHz maximum frequency

- 12,000 RPM maximum speed

- AEDA-3200 series offers plug and play capability

Applications

- Servo motors

- Stepper motors

- Pick and place machines

- Die bonders

- Robotics

- Machine tools

- Textiles

- Factory automation

Package Dimensions

- Refer to product datasheet for package dimensions

Incremental Optical Encoders
Transmissive Module

AEDS/AEDB/AEDT-9140 Series

Description

- Three channels
- Low cost
- Detects rotary position when used with a codewheel
- Consists of a lensed (LED) source and detector IC enclosed in a small plastic package
- Extremely tolerant to mounting misalignment due to a highly collimated light source and unique photodetector array
- Two channel quadrature output, plus a third channel index output. (The index output is a 90 electrical degree high, true index pulse, which is generated once for each full rotation of the codewheel)
- Designed for use with a codewheel with an optical radius of 11.00 mm (0.433 inch)
- Quadrature signals and index pulse are accessed through five 0.46 mm square pins located on 1.27 mm (pitch) centers

Features

- Two channel quadrature output with index pulse
- Resolution from 100 CPR up to 512 CPR
- Low cost
- Easy to mount
- No signal adjustment required
- Small size
- TTL compatible output
- Single 5 V supply output

For AEDT-9140 Series:

- Same features as listed above
- -40°C to 115°C operating temperature

For AEDB-9140 Series:

- Same features as listed above
- Bundled with matching codewheel

Applications

Ideal for high-volume applications, like:

- Printers
- Plotters
- Tape drives
- Industrial equipment
- Factory automation equipment

Package Dimensions

- Refer to product datasheet for package dimensions

Incremental Optical Encoders
Transmissive Module

AEDS-9240 Series

Description

- Six-channel optical incremental encoder module

- When used with a codewheel, this encoder detects rotary position

- Each module consists of a lensed LED source and a detector IC enclosed in a small plastic package

- Each module consists of a highly collimated light source and a unique photo detector array

- Modules are extremely tolerant to mounting misalignment

- Designed with integrated commutation output channels (U,V,W), two-channel quadrature outputs (A,B), plus a third channel ungated index output (I)

- Ungated index output is a positive index pulse that is generated once for each full rotation of the codewheel

- Designed for use with a codewheel that has an optical radius of 19.00 mm (0.748 inch) to obtain an optimum 360/720 CPR (count per revolution) resolution

- Quadrature, index, commutation signals and power supplied to encoder are accessed through eight 0.46mm square male connector pins located on 1.27mm pitch

- Integrated commutation outputs (U,V, and W) is equivalent to those produced by Hall Switches

- Enables motor systems to be more compact

- Optional alignment jigs enables a significantly reduced production time and ease of assembly into housed encoders

- Provides superior switching accuracy due to a much lower hysteresis when compared to Hall Switches

- Commutation signals can easily be interchanged for Brushless DC motor of different rotor pole-pairs by simply switching to matching pole-pair codewheels

Features

- Two-channel quadrature output with ungated index pulse (A,B,I)

- Three-channel integrated commutation Output (UVW)

- 360/720 Cycle Per Revolution (CPR)

- Easy assembly with alignment jig

- Design to fit into circular shaped housing

- Up to 150 kHz frequency response

- -40°C to 100°C operating temperature

- TTL Compatible

- Single 5V Supply

- Integrated feedback device for Brushless DC Motor

- RoHS Compliant

Applications

Typical applications include:

- Industrial printers
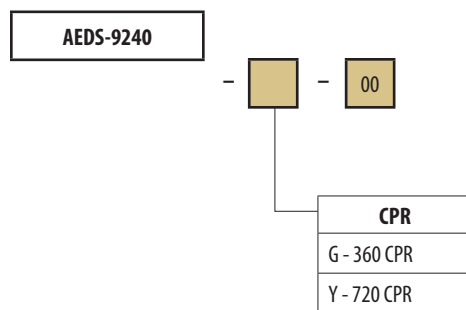

- Industrial factory automation equipment

Package Dimensions

- Refer to product datasheet for package dimensions

Note: Avago Technologies encoders are not recommended for use in safety critical applications, e.g., ABS braking systems, power steering, life support systems and critical care medical equipment. Please contact sales representative if more clarification is needed.

Incremental Optical Encoders
Transmissive Module

AEDS/AEDB/AEDT-9340 Series

Description

- 6-channel optical incremental encoder modules with codewheel

- When used with a codewheel, these modules detect rotary position

- Each module consists of a collimated LED source and detector IC enclosed within a small plastic package

- Modules are extremely tolerant to mounting misalignment

- Ungated index output is a positive index pulse (360 electrical degrees high) that is generated once for each full rotation of the codewheel

- Designed for use with a codewheel that has an optical radius of:

  i. 15 mm (0.590 inch) for 1250/2500 CPR

  ii. 12.3 mm (0.484 inch) for 1024/2048 CPR

  iii. 12 mm (0.472 inch) for 1000/2000 CPR

- Replaces conventional incremental encoder with Hall Switches

- The quadrature, index, commutation signals and power supplied to the encoder are accessed through eight 0.46 mm square male connector pins located on 1.27 mm (pitch)

- With our encoder, the system will be more compact, have reduced alignment time with use of alignment jig, thus making assembly process much easier for housed encoder integration

- Superior switching accuracy due to much lower hysteresis when compared to a Hall Switches

- The commutation signals can be generated for Brushless DC motor of different rotor pole-pairs by simply changing with matching pole-pair codewheel

Features

- Two-channel quadrature output with ungated index pulse (A, B, I)

- Three-channel integrated commutation output (U, V, W)

- Up to 2500 Cycles Per Revolution (CPR)

- Easy assembly with alignment jig

- Designed to fit into circular shaped housing

- Up to 200 kHz frequency response

- TTL compatible

- Single 5 V supply

- Integrated feedback device for Brushless DC Motor

For AEDT-9340 Series:

- Same features as listed above

- -40°C to 115°C operating temperature

For AEDB-9340 Series:

- Same features as listed above

- Bundled with matching codewheel

Applications

- Servo motors
- Stepper motors
- Pick and place machines
- Die bonders
- Robotics
- Machine tools
- Textiles
- Factory automation

Package Dimensions

- Refer to product datasheet for package dimensions

Incremental Optical Encoders
Transmissive Housed

AEDx-8xxx Series

Description

- Option of two-channel or three-channel optical incremental encoder kit with codewheel integrated in a protective housing

- Encoder kit consists of a collimated LED source and a detector IC enclosed within a small plastic package

- Two-channel quadrature outputs (A,B) plus a third channel index output (I)

- Designed for use with motors with shaft diameters of 2mm and up to 5mm

- Enables the servo system to be more compact

- Optional alignment jig enables easier assembly process for servo motor integration

- RoHS compliant

Features

- 3-channel differential output (A,B) with ungated, gated-90° and gated-180° index pulse (I)

- 2-channel differential output available

- Up to 500 Cycles Per Revolution (CPR)

- Up to 30000 rpm motor speed

- -40°C to 100°C operating temperature

- Single 5 V supply

- Integrated RS-422 line driver

- Quick and easy assembly

Applications

The AEDx-8xxx provides motion detection for DC servo motor and closed loop stepper motor feedback system in the following applications:

- Pick and place machines
- Semiconductor equipment
- Factory automation equipment

Package Dimensions

- Refer to product datasheet for package dimensions

HEDS-65xx, HEDM-65xx, HEDL-65xx Series

Description

HEDS-65XX Series

- High performance two and three channel optical encoders

- High reliability, high resolution and easy assembly

- Contains a lensed (LED) source or emitter, integrated circuitry and a codewheel which rotates between the emitter and detector IC

- HEDS-6500 series output features two single-ended square waves in quadrature

- HEDS-6540 series output has a third channel index output in addition to the two quadrature outputs. This index is an active high pulse that occurs once every full rotation of the codewheel

- Resolutions up to 1024 CPR available in two and three channel versions

HEDM-65XX Series

- Same features as listed above

- Comes with film codewheels

- Resolutions available in 2,000 and 2,048 CPR in two and three channel versions

HEDL-65XX Series

- Comes with differential outputs

- Utilizes an industry standard line driver IC (an integrated RS-422 differential line driver), which provides complementary output for each encoder channel and enables enhanced performance when the encoders are used in noisy environments or when they are required to drive long distances

- Suggested line receivers: 26C32 and 26C33

- Quadrature signals are accessed through a cable and 10-pin female connector, which is manufactured by FCI, part number: 66900-310. The mating connectors manufactured by FCI; straight type part number: 71912-010, right angle type part number: 71913-010

Features

- Two channel quadrature output with optional index pulse

- HEDS series features TTL-compatible, single-ended outputs

- Up to 70°C operating temperature for HEDM series

- Up to 100°C operating temperature for HEDL and HEDS series

- HEDL series features industry-standard 26C31 line driver IC

- Easy assembly, no signal adjustment necessary

- Up to 2,048 CPR

- Maximum shaft diameter of 5/8 inches

- Single 5V supply

- Count frequency of 100 KHz
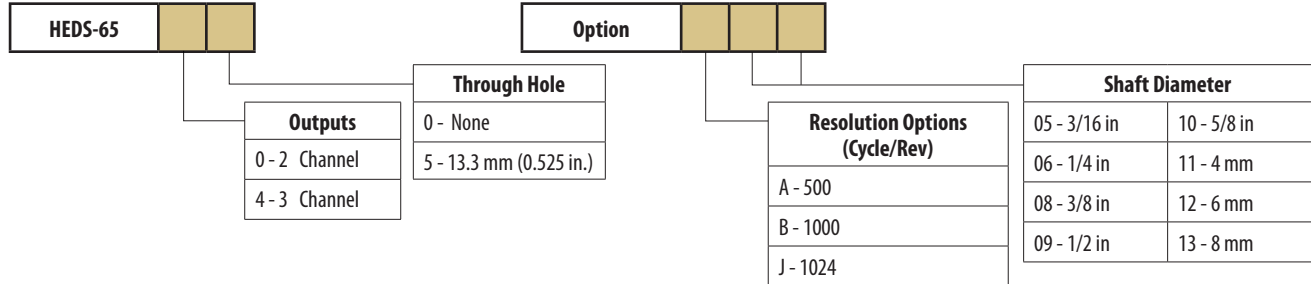

Applications

- Machine tools

- Textiles

- Photocopiers and printing machinery

- Pulp and paper

- Chemical and pharmaceutical

- Factory automation assembly

- Automatic handlers

HEDL-5xxx, HEDS-550x/554x, HEDS-560x/564x, HEDM-550x/560x Series

Description

HEDS-550X/HEDM-550X/HEDS-560X and HEDS-554X/HEDS-564X Series

- High-performance, two and three channel incremental optical encoders

- High reliability, high resolution, easy assembly

- Contains a lensed (LED) source or emitter, an integrated circuit with detectors and output circuitry, and a codewheel which rotates between the emitter and detector IC

- HEDS-550X/HEDM-550X/HEDS-560X output is two square waves in quadrature

- HEDS-554X/HEDS-564X output has a third channel index output in addition to the two channel quadrature

- The index output is a 90 electrical degree, high true index pulse which is generated once for each full rotation of the codewheel

- Features quick and easy motor mounting

HEDM-55XX/56XX Series

- Features same as listed above

- Comes with film codewheels

HEDS-56XX and HEDM-56XX Series

- Features same as listed above

- Features mounting ears HEDL-55XX Series

- Features differential output

- Utilizes an industry-standard line driver IC (26C31), which provides complementary output for each encoder channel, offering enhanced performance when the encoders are used in a noisy environment, or when required to drive long distances

- Suggested line receivers: 26C32 and 26C33

- Quadrature signals are accessed through a cable and 10-pin female connector, manufactured by FCI, part number: 66900-310. Mating connectors are made by FCI; for straight type part number: 71912-010, right angle type part number: 71913-010

Features

- Two channel quadrature output with optional index pulse

- Quick and easy assembly

- No signal adjustment required

- External mounting ears available

- Low cost

- Resolutions up to 1,024 CPR

- Small size

- Up to 100°C operating temperature

- TTL compatible

- Single 5 V supply

- Count frequency of 100 KHz

Applications

**Ideal for high-volume applications, including:**

- Printers

- Plotters

- Tape drives

- Positioning tables and automatic handlers

Incremental Optical Encoders
Transmissive Housed

HEDS-57xx Series (Rotary Pulse Generators)

Description

- Low cost
- High performance
- Comes with mounted shafts and bushings
- Available with tactile feedback for hand-operated panel mount applications, or with a free spinning shaft for applications requiring a pre-assembled encoder for position sensing
- Contains a collimated (LED) light source and special detector circuit which allows for high resolution, excellent encoding performance, long rotational life, and increased reliability
- Two digital output waveforms which are 90 degrees out of phase to provide position and direction information
- HEDS-5740 series provides a third index channel
- HEDS-5700 is quickly and easily mounted to a front panel using the threaded bushing. It can also be directly coupled to a motor shaft (or gear train) for position sensing applications

Features

- Two-channel quadrature output with optional index pulse
- Available with or without static drag for manual or mechanized operation
- Resolution up to 512 CPR
- Long rotational life; >1 million revolutions
- -20°C to 85°C operating temperature
- TTL quadrature output
- Single 5V supply
- Available with color-coded leads
- Up to 2000 rpm operating speed

Applications

**HEDS-5700
(with static drag option)**

Ideal for applications requiring digital information from a manually operated knob. Front panel applications include:

- Instruments
- CAD/CAM systems
- Audio/video control boards

**HEDS-5700
(free spinning option)**

Ideal for low speed, mechanized operations:

- Copiers
- X-Y tables
- Assembly line equipment

Package Dimensions

- Refer to product datasheet for package dimensions

Incremental Optical Encoders
Reflective Module

AEDR-83xx Series

Description

- New generation encoder
- SMT and leadless package, ideal for applications with critical space constraints
- More accurate real-time position indicator
- Single-channel and two-channel motion sensing at a very low cost
- Uses reflective technology to sense rotary or linear position
- Consists of an LED light source and a photodetector IC in a single package
- Provides either single channel or two channel square wave outputs in quadrature for count and direction information
- TTL-compatible outputs correspond to the alternating reflective/non-reflective patterns of the codewheel or codestrip
- High codewheel/strip gap tolerance & tolerant to angular misalignment

- Can be used over a range of codewheel and codestrip resolutions
- RoHS compliant
- Very low power consumption

Features

- Size: 5.12 mm (L) x 3.96 mm (W) x 1.63 mm (H)
- Resolutions of 36, 75, 150, 180 and 212 LPI
- 30 kHz, maximum operating frequency (60kHz for 212LPI)
- Rotary and linear motion sensing
- -20°C through 85°C absolute operating temperature
- One or two channel quadrature output for positioning and homing capabilities
- Single 5 V supply (3.3 V available for 212LPI)

For AEDR-8311:

- Suitable for indexing function
- -20°C to 85°C operating temperature

Applications

Ideal for high-volume applications:

- Printers
- Copiers
- Card readers
- Scanners
- Cameras
- Motor solutions
- Medical equipment
- Wafer handling machines
- Vending machines
- Low servo systems
- ATM machines
- Textile machines
- Industrial sewing machines
- Consumer product applications

Package Dimensions

2. 36LPI resolution is only available in one channel option.
3. Encoders are packed in tape quantities of 100, 500 or 1000 pieces.

4. Contact factory for matching codewheel unit or codewheel design.
5. Contact factory for higher resolution and 3 channel encoder solutions.

Incremental Optical Encoders
Reflective Module

AEDR-8320 Series
Description

- New generation encoder
- SMT and leadless package, ideal for applications with space constraints
- More accurate real-time position indicator
- Two-channel motion sensing at a very low cost
- Uses reflective technology to sense rotary or linear position
- Consist of an LED light source and a photodetector IC in a single package
- Can be used over a range of codewheel and codestrip resolutions
- Very low power consumption

Features

- Size: 6.50mm (L) x 4.20mm (W) x 1.69mm (H)
- Resolution: 180 LPI
- 30kHz, maximum operating frequency
- Rotary and linear motion sensing
- -10ºC through 70ºC absolute operating temperature
- Analog output
- As an example, 7840CPR can be achieved with interpolation factor of 16x where codewheel Rop is at 11mm
- Single 5V supply
- RoHS compliant

Applications

- Printers
- Copiers
- CD/DVD writers
- Card readers
- Pick and place machines
- Security cameras
- Motors
- XY table
- Housed encoders

Package Dimensions

Incremental Optical Encoders
Reflective Module

AEDR-8400 Series

Description

- Smallest optical encoder
- Houses an LED light source and a photo-detecting circuitry in a single package
- Offers two-channel quadrature digital outputs
- Outputs can be interfaced directly with most of the signal processing circuitries
- Provides great design in flexibility and easy integration into existing systems
- Very low power consumption

Features

- Size: 3.00 mm (L) x 3.28 mm (W) x 1.262 mm (H)
- Encoding resolution: 254 (lines/inch) or 10 (lines/mm)
- Reflective technology
- Surface mount leadless package
- -20℃ to 85℃ absolute operating temperature
- Rotary or linear motion sensing
- Two channel quadrature digital outputs for direction sensing
- TTL compatible output
- Single 2.8 V supply
- 15 KHz operating frequency
- Very low power consumption

Applications

Ideal for high volume applications:

- Printers
- Copiers
- Card readers
- Scanners
- Digital Still Cameras
- Camcorders
- Camera Phones
- Projectors
- Consumer Product Applications

Incremental Optical Encoders
Reflective Housed

HEDR-542x Series

Description

- High performance
- Cost-effective
- Two channels
- High reliability, high resolution and easy assembly
- Uses reflective technology to sense rotary position
- Consists of an LED light source and photodetector IC in a single SO-8 surface mount package
- HEDR-542X output - two square waves in quadrature
- Quick and easy motor mounting

Features

- Two channel quadrature output
- Quick and easy assembly
- Cost-effective
- Ideal for small motor systems
- Resolutions at 200 CPR
- 0°C to 85°C operating temperature
- Right angle connector available
- Hub available in either a set screw configuration or a press-fit/adhesive mount configuration
- External mounting ears available

Applications

- Wafer handling machines
- Vending machines
- Motor manufacturing applications

Package Dimensions

Incremental Optical Encoders
Reflective Housed

HRPG Series (Rotary Pulse Generators)

Description

- Family of miniature panel-mount optical encoders and digital potentiometers
- Can be mounted on a front panel and used as a rotary, data-entry device
- Multiple configuration options accommodate a variety of different applications
- Available options include: detents or smooth, multiple terminations, versatile mounting capabilities, and different shaft configurations
- Uses optical reflective technology
- Single IC detector circuit makes the part less sensitive to temperature and other environmental variations

Features

- Miniature size
- Smooth turning and detented options
- Multiple mounting bracket options
- Quadrature digital output
- Small footprint for versatile mounting
- TTL compatible output
- Up to 120CPR
- 5 V operation
- 0°C to 70°C operating temperature
- Up to 300RPM rotation speed

Applications

- Front panel instruments
- Audio/visual boards
- Other devices requiring digital output from a turning knob

Package Dimensions

- Refer to product datasheet for package dimensions

Incremental Magnetic Encoders
Magnetic Housed

AEAT-601B Series

Description

- Miniature package
- Ideal for space constraint applications
- Non-contact magnetic sensing technology
- Specifically designed to serve the industrial market with wide temperature ranges and requiring high accuracy
- Easy assemble process

Features

- 23mm diameter X 19mm height package
- Resolution ranges of up to 256 CPR
- Quadrature A, B and Index output (I)
- Wide operating temperature range from -40℃ through 125℃
- Single +5V supply
- Bare wires output
- RoHS compliant
- Fit standard 6 mm customer solid shaft

Applications

- Stepper motor feedback
- Textiles
- Rotary positional feedback

Absolute Optical Encoders
Transmissive Module

AEAT-7000 Series (Single-Turn Module)

Description

- 13-bit absolute encoder module
- Feedback device which generates a unique binary 'word' for each encoder shaft position
- Encoder design provides positional information instantly upon power up, unlike incremental encoders that require codewheel movement to obtain such information
- Ideal for space-constrained applications
- Easy alignment and installation
- Contains 13 signal photodiode channels and 1 monitor photodiode channel - each accompanied by precision amplifiers and additional circuitry
- The integrated chip, together with a highly collimated light source and precision codewheel, outputs up to 13 bits of positional information to the user via a serial synchronous interface

Features

- Miniature size, consists of 2 components only
- -40°C to 85°C standard operating temperature
- Quick and easy assembly
- Cost effective
- 11 digital tracks plus 2 sin/cos tracks to generate precise 13 bit gray code
- Ultra-fast, 1 µs cycle for serial data output word equals 16 MHz
- On-chip interpolation and code correction to compensate for mounting tolerance
- Internally built-in monitor track for tracking the light level

Applications

- Semiconductor automation machines
- Industrial sewing machine
- Robotics
- Automotive (body plant robot cells for assembly and welding)
- Machine tools

Package Dimensions

- Refer to product datasheet for package dimensions

1. AEAT-7000-1GSD0 (13-bit resolution)

Note: Contact factory for higher resolution absolute encoder solutions.

Absolute Magnetic Encoders
Magnetic Housed

AEAT-60xx Series (Single-Turn Housed)

Description

- 10 & 12 bit absolute encoder module

- Feedback device which generates a unique binary "word" for each encoder shaft position

- Encoder design provides positional information instantly upon power-up, unlike incremental encoders that require codewheel movement to obtain such information

- Plug and play features eliminates the need for multiple alignment adjustment, making installation very simple

Features

- 10 or 12 bits resolution

- Contactless sensing technologies

- Wide temperature range from -40° to 125°C

- Absolute angular position detection

- Serial Interface output for absolute position data (binary format)

- Code monotony error = ± 1 LSB

- Single 5V supply

- Easy assembly, no signal adjustment required

- RoHS compliant

Applications

- Flow meter

- Angular detection

- Knob control

- Rotary encoder

Absolute Optical Encoders
Transmissive Module

AEAT-84AD/AEAT-86AD Series (Multi-Turn Module)
Description

- Optoelectronic-mechanical unit
- Provides multiturn capabilities when used with the AEAT-7000 single-turn absolute encoder
- When used together with AEAT-7000 or AEAT-6010/6012, the designer gains a complete multiturn absolute encoder with a total resolution of up to 31 bits (contact factory for OEM integrated solution with up to 17-bit single-turn and 14-bit multi-turn)
- Enables the designer to count the number of rotations that the motor shaft has gone through
- Ideal for space constrained applications
- The plug and play feature eliminates the need for multiple alignment adjustments, making installation very simple
- Consists of an IR-LED circuit board, a phototransistor (PT) circuit board, and either 6 (12 bits) or 7 (14 bits) code wheels, arranged in between the PCBs. This construction enables AEAx-8xAD to provide absolute multiturn positioning information without battery backup

Features

- 12-bit and 14-bit resolution within small form factor
- -40°C to 125°C maximum operating temperature
- Gearing system can tolerate up to 12,000 rpm of speed, making it ideal for fast spinning applications like servo motors
- Integrator chip (built-in option available – AEAT-86AD)

Applications

- Robotics
- Machine tools
- Industrial sewing machines
- Semiconductor automation machines
- Packaging machines

Package Dimensions

- Refer to product datasheet for package dimensions

Integrated Circuits
Decoder

HCTL-2001/2017/2021 Series

Description

- CMOS ICs that performs the quadrature decoder, counter, and bus interface function
- Improve system performance in digital closed loop motion control systems and digital data input systems
- Consist of a quadrature decoder logic, a binary up/down state counter, and an 8-bit bus interface
- Allows reliable operation in noisy environments
- HCTL-2001 contains a 12-bit counter
- HCTL-2017/2021 contains a 16-bit counter and provides TLL/CMOS compatible tri-state output buffers
- Operation is specified for a temperature range from -40°C to 85°C at clock frequencies up to 14MHz

Features

- Interfaces encoder to microprocessor
- 14 MHz clock operation
- High noise immunity: Schmitt Trigger Inputs and digital noise filter
- 16-bit binary up/down counter
- Latched outputs
- 8-bit tri-state interface
- 8, 12 or 16-bit operating modes
- Quadrature decoder output signals, up/down and count
- Cascade output signals, up/down and count
- Substantially reduced system software
- 5V operation (VDD-VSS)
- TTL/CMOS compatible I/O
- Operating temperature: - 40°C to 85°C
- 16-Pin PDIP, 20-Pin PDIP, 20-Pin PLCC

Applications

- Interface quadrature incremental encoders to microprocessors
- Interface digital potentiometers to digital data input buses

Package Dimensions

- Refer to product datasheet for package dimensions

Integrated Circuits
Decoder

HCTL-2022/2032 Series

Description

- CMOS ICs that perform quadrature decoding, bus interfacing and counter functions
- Designed to improve system performance in digital, closed-loop motion control systems and digital data input systems. ICs interface the encoder to the microprocessor
- HCTL-2022 comes in a 20-pin PDIP (Plastic Dual In-Line Package)
- HCTL-2032 comes in a 32-pin PDIP
- HCTL-2032-SC comes in a 32-pin SOIC
- HCTL-2032/2032-SC are not pin-to-pin compatible with the HCTL-2000 series, but it is backward compatible in terms of functionality with some added enhancements
- HCTL-2032 IC supports single or dual-axis support. Cost savings realized due to decrease in on-board components
- HCTL-2022 is similar to the HCTL-2032 with only single-axis control
- Large counter allows the IC to operate without the support of extra memory, further reducing the number of supporting components needed on board and decreasing cost

- Features allow deeper penetration into the industrial automation market, such as the servo motor market
- Key advantages over competitors:
- HCTL-2022/2032 operates at a wider range of temperatures, making it suitable for deeper penetration into the industrial automation market
- Cascaded output signals allow design flexibility
- A 32-bit counter size allows the product to operate without the need of external counters, reducing the component count on the PCB and therefore cost
- Higher frequencies let the HCTL-2022/2032 operate with a wider range of encoders

Features

- Operates up to 33 MHz
- 32-bit binary up/down counter
- -40°C to 100°C operating temperature
- Programmable count modes (1x, 2x or 4x)
- Index channel support provides the ability to reset latched output when necessary

- High noise immunity. The Schmitt Trigger Input and Digital Noise Filter rejects noise on incoming quadrature signals
- Latched output, allowing stable output to microcontroller
- 8, 16, 24, or 32-bit operating modes
- Cascade-able output signals, up/down and count, trigger an external decoder or counter in case of an underflow/overflow situation
- Substantially reduced system software
- Comes with hardware built-in counters. Generally no external counters are required

Applications

- Machine tools
- Servo motors
- Sewing machines
- Robotics
- Measurement equipment
- Printers and printing machines
- Automobile service equipment

Codewheels

Transmissive

HEDS-51x0/61x0, HEDG-512x/612x, HEDM-512x/61xx Series

Description

- Wide range of codewheels for use with HEDS-90XX/91XX series encoder modules
- Designed for many environments, applications and budgets
- Available in glass, film and metal
- Resolutions from 96 to 1024 CPR on an 11-mm optical radius, and 500 to 2048 CPR on a 23.36-mm optical radius
- Each of the three codewheel materials offers certain advantages

HEDS-51X0/61X0 Series

- Metal codewheels are the most versatile
- Temperature rating up to 100°C
- HEDS-51X0 offers resolution up to 512 CPR
- HEDS-61X0 offers resolution from 500 to 1024 CPR
- 2 and 3 channels output

HEDM-504X/512X/61XX Series

- Film codewheels offer higher resolution
- HEDM-504x offers resolution of 1000 CPR
- HEDM-512X offers resolutions of 1000 and 1024 CPR
- HEDM-61XX offers 2000 and 2048 CPR
- 70°C operating temperature
- 2 and 3 channels output

HEDG-512X/612X Series

- Glass codewheels combine the best of film and metal
- Operating temperature 100°C
- HEDG-512X offers resolution of 1000 and 1024 CPR
- HEDG-612X offers resolution of 2000 and 2048 CPR

Features

- Codewheels available in glass, film and metal
- Available in two standard diameters (11 mm and 23.36 mm optical radius)
- Cost effective
- For use with HEDS-90XX/91XX series two and three channel encoders

Applications

- Printers
- Plotters
- Tape drivers
- Industry automation equipment
- Factory automation equipment

Reflective

Customized. Consult factory for these special parts.

Definition of Key Terms

Product Technology	Description
Absolute Encoder	A type of encoder which generates a unique code for each position, unlike an incremental encoder, which only generate pulses proportional to position. An absolute encoder has the distinctive feature of being able to provide positional information instantly upon power up.
Absolute Multi-Turn Encoder	In addition to the Absolute Single-Turn Encoder, this type of Absolute Multi-Turn Encoder provides shaft revolution detection, usually through means of an integrated gear, in which the code representation for each revolution is unique. Combined with Absolute Single-Turn Encoder, it provides unique positional information beyond one revolution.
Absolute Single-Turn Encoder	A type of absolute encoder whereby each measurable angular position provides unique positional information, within one revolution, without the need of counter and homing operation, upon power up.
Codewheel and Codestrip	Codewheel and codestrip are patterned discs or strips that translate a mechanical position into a representative electrical signal when used with an optical encoder. A codewheel is used for rotary motion while a codestrip is used for side-to-side motion. In a transmissive encoder, the bars block light and the windows allow light to pass through. In a reflective encoder, the bars absorb light while the windows reflect light.
Controller IC	A PID Motor Controller IC commands the motor operation by taking the feedback signal from the encoder output. It frees the host processor for other tasks by performing all the time intensive functions of digital motion control.
Decoder/Counter IC	Interfaces the encoder to the microprocessor. A decoder and counter IC converts the incremental signal from the encoder to a binary number.
Housed Encoder	An enclosed encoder with protective housing that normally has a defined IP rating.
Incremental Encoder	A type of encoder that provides relative position, whereby the feedback signal is always referenced to a start or home position. On an incremental encoder, each mechanical position is not uniquely defined. The current position sensed is only incremental from the last position sensed.
Linear Encoder	A type of incremental encoder that provides high resolution linear incremental positioning information. The linear encoder is a good alternative to designers who need to measure linear movement in high resolution.
Module Encoder	A basic encoder unit that integrates the detector and emitter in a single unit.
Optical Encoder	Sensors that use light to sense the speed, angle and direction of a rotary shaft.
Reflective Encoder	Consists of an emitter and detector, each positioned on the same side of the codewheel/codestrip.
Rotary Encoder	Also known as a shaft encoder. A type of incremental encoder that converts angular position of a shaft or axle to a digital code. Rotary encoders can also be used to measure linear motion, with the use of a ballscrew systems, to translate linear motion into rotary motion.
Transmissive Encoder	Consists of an emitter and detector, each positioned at opposite sides of the codewheel/codestrip.
Magnetic Encoder	Contactless magnetic sensing absolute rotary encoders suitable for dusty and high temperature environment.

Definition of Key Terms

Detector sets

Single Detector
- It looks at only the window or bar
- Defects at individual windows or bars cause error

Multiple Photodetectors
- It looks at many windows or bars
- Minimizes error due to defects at individual windows or bars
- Increases detected signal strength

Avago encoders employ multiple detector sets. Each set consists of differential outputs with push/pull circuitry. See diagram 2 below. An explanation on the operation of the differential signaling is described in the next item.

Definition of Key Terms

Differential Signaling

Why use differential signaling?

- Insensitive to variations in light
- Hysteresis in comparators prevents oscillation
- Switching points remain the same, independent of light level
- Negates effect of light level variation

Diagram 3: Differential Detector output
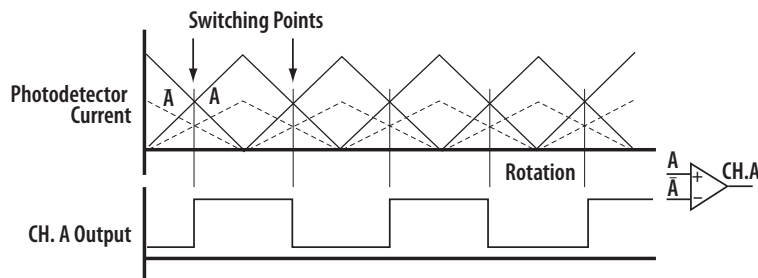

How does differential signaling work?

- Signals for A and its complement A(bar) are sent to comparator
- When A receives more light than A(bar), then Ch. A is high
- Otherwise, if A(bar) receives more light than A, then Ch. A is low

Diagram 4: Single channel detector output

Definition of Key Terms

LPI:

Lines Per Inch

CPR:

Counts Per Revolution

LPI Formula

Window   Bar

1 Count (x)
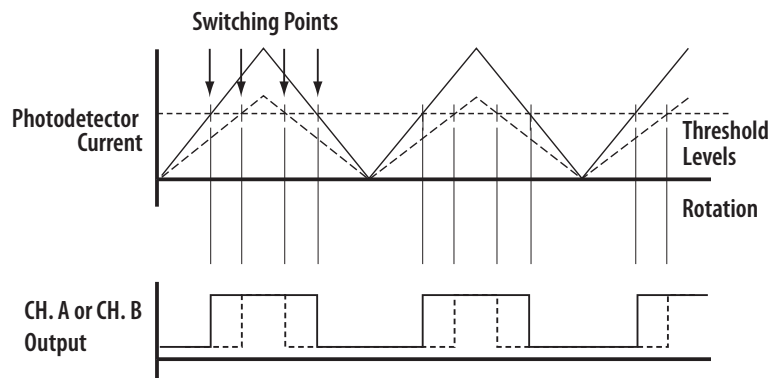

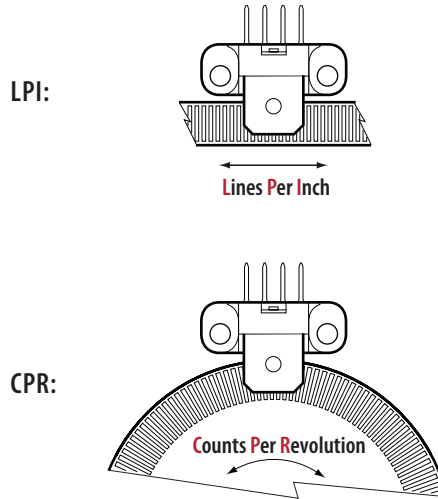

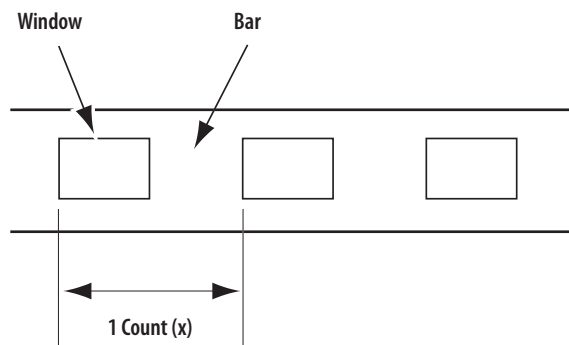

LPmm can be used instead of LPI (Lines Per Inch). LPmm means the number of 'Lines Per mm'. The method of calculation for LPmm is the same as LPI. The only difference is that the 'mm' replaces 'Inch' as the standard measurement of length.

The formula for LPI and LPmm is as follows:

$$LPI = \frac{1}{x\ (Inch)} \qquad\qquad LPmm = \frac{1}{x\ (mm)}$$

Where x = length of Window and Bar pair length

Definition of Key Terms

CPR Formula
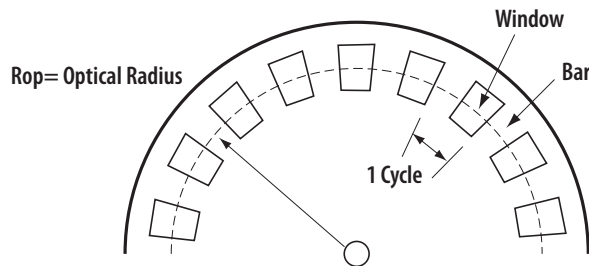

1 Cycle = the mechanical rotation that corresponds to one pair of Window and Bar.

CPR = Number of Window and Bar pairs over full rotation

Converting CPR to LPI and LPmm

$$\text{Count Density} = \frac{\text{Number of Window and Bar pair}}{\text{Arc Length}} = \frac{\text{CPR (count over full rotation)}}{2\pi\text{Rop (Arc length over full rotation)}}$$

$$\text{LPI} = \frac{\text{CPR}}{2\pi\text{Rop(Inch)}} \qquad \text{LPImm} = \frac{\text{CPR}}{2\pi\text{Rop(mm)}}$$

Calculation for Customized Resolution

Assuming you would like to use an Encoder with a known CPR and Rop for a custom CPR resolution, the LPI or LPmm must match for the encoder to operate properly.

The formulas described on the previous page can be used to calculate the new codewheel dimension. To retain the same LPI or LPmm, increase the CPR, then the Rop will increase accordingly. If the CPR is decreased, the Rop will also decrease accordingly.

For example, for the case of HEDS-9000-Txx. This is a 2000CPR at 23.36mm Rop encoder. Assuming we want to use a customized codewheel with a CPR of 4000CPR with this 2000CPR encoder.

Definition of Key Terms

The table below simplifies the problem statement. The encoder and custom codewheel LPI must match in order for the encoder to operate properly. The new CPR is known and the only unknown is the Rop of the custom Codewheel to ensure that the new codewheel, LPmm matches that of the encoder specifications. We have to identify what is the new Codewheel Rop.

	Encoder Specification	Custom CW Specification
CPR	2000	4000
Rop	23.36 mm	Unknown (x)
LPmm	13.6245	

First, calculate the LPmm of the encoder:

$$LPmm = \frac{CPR}{2\pi Rop(mm)}$$

$$LPmm = (2000)/(2\pi*23.36) \qquad \pi = 3.142$$

$$LPmm = 13.6245$$

The new 4000CPR codewheel must also match this 13.6245LPmm. Next, find the appropriate Rop for 4000CPR:

$$LPmm = \frac{CPR}{2\pi Rop(mm)}$$

$$13.6245 = 4000/(2\pi*x)$$

$$Rop(mm) = 46.72 \text{ mm}$$

The new Codewheel for 4000CPR must have a Rop of 46.72mm to be used with a 2000CPR 23.36mm encoder.

	Encoder Specification	Custom CW Specification
CPR	2000	4000
Rop	23.36 mm	46.72 mm
LPmm	13.6245	

Important: The LPI or LPmm for the codewheel and the encoder must match for the encoder to operate properly.

Notes:

1. This is an overview of product range and specifications. For further product details and a complete list of distributors, please visit our web site at http://www.avagotech.com/motioncontrol
2. Data subject to change. Please refer to the latest datasheets available in our website.
3. Refer to factory for different product shaft or bore diameter sizes (this refers to the inner diameter of the bore, unless specified otherwise).
4. AEAT-8xAD series uses mechanical pinion gear for its mechanical linkage. Please refer to factory for further details.
5. Data shown is an approximation of the actual dimensions. (W = width, L=length, H= height, Æ = diameter).
6. All given resolution is before full 4X multiplication or quadrature decode. For example, 2048 CPR (cycle per revolution) can be further decoded to 8192 PPR (pulse per revolution).
7. The resolution shown is typically based on CPR (Cycle Per Revolution), unless specified otherwise .
8. For linear encoder option.
9. As some modular encoders can be used as both rotary and linear encoder, these encoders may be coupled with codewheel or codestrip dependent on application.
10. As there are diversified design of matching codewheels or codestrips, please refer to factory for further details. General information can be found in HEDS-51X0/61X0 series two and three channel codewheels.
11. Dimensions shown are referring to encoder module size only, excluding the codewheel size.
12. Two channels of analog / digital output are available.
13. The temperature range shown may vary as it is dependent on selected options and type of codewheels.
14. The count frequency may vary according to different part numbers and options. The specified value indicates the maximum count frequency allowed.
15. This refers to the response frequency of the encoder.

About Avago Technologies

Avago Technologies is a leading supplier of analog interface components for communications, industrial and consumer applications. By leveraging its core competencies in III-V compound and silicon semiconductor design and processing, the company provides an extensive range of analog, mixed signal and optoelectronics components and subsystems to more than 40,000 customers. Backed by strong customer service support, the company's products serve four diverse end markets: industrial and automotive, wired infrastructure, wireless communications, and computer peripherals. Avago has a global employee presence and heritage of technical innovation dating back 40 years to its Hewlett-Packard roots. Information about Avago is available on the Web at www.avagotech.com
